

2 LEADING CLOUD-BASED SYSTEMS

for managing your library

Provide an effective service to your users with these top library management solutions from Sabinet.

WorldShare® Management Services (WMS)

An integrated suite of cloud-based library management and discovery applications packaged together to give you a comprehensive and cost-effective way to manage library workflows and improve access to library collections and services.

WMS enables libraries to draw on the collaborative data and work of libraries worldwide.

Acquisition

Circulation

Metadata and e-resource management

Resource sharing

Reports

A single-search discovery interface for library users

YOU:

- Save time, and improve service delivery
- Streamline workflows
- Realise significant cost savings
- Manage e-resources efficiently.
- Improve discovery for your users and visibility for your library.
- Get better reporting and insight about your systems.

Amlib

An integrated library system that allows libraries to manage all aspects of their work through a customisable interface. Amlib modules allow libraries to support catalogue enhancements, circulations, interlibrary loans, acquisitions, patron management, reporting and more.

YOU:

- Can customise the interface.
- Are able to manage items, periodicals, orders and patrons.
- Can enrich your content.
- Can gain insight about patrons, circulations and more.
- Can manage circulation and interlibrary loans.
- Get a single integrated solution.
- Will comply with library and technology standards.
